Dear Christian,

Please accept our profound thanks to you for joining us in the celebrations of Martin Luther King Jr. Birthday on Saturday, January 15 at 7:30 pm PST USA. Your association with the event has enhanced the stature of the program and its contents. We are grateful to you for the profound message you shared with participants on the occasion. The participation of so many important functionaries from around the world making this a real global event enhances our commitment to world peace and social justice. It stresses the importance of all institutions and individuals working for peace to come together and make an impact. I am a firm believer that good people in this world are in vast majority. But they are not united. Each one has his/her own small flag and agenda. Selfish people are small in number. But they are united and powerful helping one another. Our concern is how to bring together the positive forces in society.

It is not only your words of wisdom but your help in providing many important documents referred to by speakers which enhanced the utility of program. This Global Meet has opened up several possibilities that we need to work on. COVID created uncertainty for the whole world and we had to shift to Online Mode. We can keep working on this mode till alternatives become possible.

With Grateful Regards,

Prasad
